Help us help others: The APGA has partnered with the Class of 1987 and the Pace Center to support the Community House Summer STEAM Program. Designed by Princeton undergraduate students, the program aims to ignite a passion for science, technology, engineering the arts and math with underrepresented middle school students in the Princeton area.

APGA Reunions attendees are asked to donate various supplies needed to set up the program’s summer classroom. A collection box will be available at APGA Headquarters in Cuyler Courtyard throughout Reunions weekend.
